

# Jobs to be done

**User Name:** Clara Dupont

**Passion for Music:** Loves discovering new artists and albums, especially in Latin and indie genres.

## JTBD Model

When I visit a music label's website, I want to see the latest releases and recommendations, so that I can expand my music library and feel the excitement of discovering new tracks.

## Questions Asked to the User

### What do you usually look for on a music label's website?

- When I visit a music label's website, I want to find the latest album releases, recommended playlists, and concert information **so I can** stay updated with new music and upcoming events.

### Why is this information important to you?

- When I find these details, I want to stay informed about my favorite music so I can discover new artists and improve my listening experience.

### What emotions do you feel when you visit this type of website?

- When I explore a music website, I want to feel excited and curious so I can enjoy the thrill of finding something unexpected and new.

### What would you like to do easily on the website?

- When I'm using the website, I want to create playlists and receive personalized recommendations so I can enjoy music that suits my tastes based on what I've listened to before.

### Have you experienced any frustrations using music label websites?

- When I encounter difficulties navigating a site, I want to quickly find what I'm looking for so I can avoid frustration and enjoy the site without distractions like excessive ads.

## Conclusion

This JTBD analysis provides valuable insights into the user's needs and motivations when interacting with music label websites. By understanding these needs, we can enhance the user experience, making the site more appealing and easier to navigate.
