

INSIGHTS ON HYDRATION FOR ATHLETES

URINE COLOR CAN INDICATE A BODY MASS LOSS OF 2% OR MORE

- **Quote:** "A urine color ≥ 5 indicated BML $\geq 2\%$ with 88.9% sensitivity and 84.8% specificity."
- **Article:** Accuracy of Urine Color to Detect Equal to or Greater than 2% Body Mass Loss in Men Journal of Athletic Training.

WOMEN SHOULD AIM FOR 11 CUPS OF WATER PER DAY WHILE MEN SHOULD AIM FOR 16.

- **Quote:** "Experts recommend drinking roughly 11 cups of water per day for the average woman and 16 for men."
- **Article:** The Importance of hydration.

HYPOTHYDRATION AFFECTS CORE TEMPERATURE AND PERFORMANCE.

- **Quote:** "A potential consequence of hypohydration is a generally linear increase in core temperature during physical activity."
- **Article:** Fluid Replacement for the Physically Active.

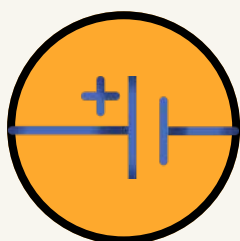

ENDURANCE ATHLETES SHOULD CONSUME CARBOHYDRATES DURING PROLONGED EXERCISE.

- **Quote:** "For intense prolonged exercise lasting longer than 1 h, athletes should consume between 30 and 60 g/h."
- **Article:** Fluids and Hydration in Prolonged Endurance Performance.

HEAT AFFECTS ENDURANCE CAPACITY AND PERFORMANCE DURING RUNNING

- **Quote:** "Endurance capacity is impaired much more in hot environments than in cool conditions."
- **Article:** Dehydration and its effects on performance.

MAXIMAL CARDIAC OUTPUT AFFECTS ATHLETE'S PERFORMANCE

- **Quote:** "The most likely physiological mechanism affecting a person's maximal aerobic power (VO2 max) and hence athletic performance is one's maximal cardiac output."
- **Article:** The Effects of Hydration on Athletic Performance.
